

GALAXY

Stock Management System

User & Instruction Guide

For Software Engineers & System Administrators

Version 1.1 · June 2026

Developed by KNOX Digital Agency · knoxlive.com

1. What is Galaxy?

Galaxy is a complete stock and order management system designed for retail businesses in Sri Lanka. It runs entirely inside a single web page — no internet connection, no installation, and no server required. Open the file in any modern browser and the system is ready to use.

Galaxy is built to be simple enough for non-technical business owners while being powerful enough to manage inventory, orders, staff, and financial reporting in one place.

What Galaxy can do

- › Manage product inventory across multiple warehouses
- › Record and track customer orders from placement to delivery
- › Generate sales, stock, customer, staff, and finance reports
- › Control what each staff member can see and do based on their role
- › Display client branding — logo, business name, and category — throughout the system
- › Show announcement banners and image slides for internal communications

System at a glance

Item	Detail
File type	Single HTML file — open in any browser
Pages	12 pages: Login, Dashboard, Item Stock, Add Product, Warehouses, Manage Orders, Place Order, Reports, Users, General Settings, Billing, Help
Font	Plus Jakarta Sans — weights 400 to 900
Session	Login session stays active while the browser tab is open. Resets when the tab is closed.

2. Login Page

When the file is opened, the login screen appears first. It has two layers — an animated background and a centred login box.

▲ Galaxy Login Screen — showing [Forgot password?](#) link below Sign In button

Background — Animated Star Field

The background is a full-screen animated canvas that simulates deep space. It runs automatically when the page loads and has three layers:

- › Static stars — 280 small white and blue-tinted dots of varying sizes. Each star gently pulses (twinkles) and drifts slowly across the screen.
- › Drifting star clusters — groups of stars that move together, giving a sense of depth and parallax.
- › Shooting stars — bright streaks that enter from the left or right edge at random intervals, travel diagonally, fade in and then fade out.

Background is pure black (#000000). Stars are white with occasional blue-tinted stars (hsl 200–280°) for visual variety.

Login Box

Centred glass panel — semi-transparent frosted design that blurs the starfield behind it.

Box appearance

- › Shape — rounded rectangle, border-radius: 28px
- › Background — semi-transparent white at 12% opacity: `rgba(255,255,255,0.12)`
- › Blur effect — `backdrop-filter: blur(60px)` — creates the frosted glass look
- › Border — 1px solid `rgba(255,255,255,0.3)` — soft white glow edge
- › Size — 400px wide, padding 40px top/bottom, 44px left/right
- › Mouse glow — a canvas layer sits over the box border. As the mouse moves near the box, a glowing arc follows the cursor around the border. Decorative effect only.

Box contents — top to bottom

- > ① Galaxy logo — 88×88px rounded image, centred, border-radius: 22px
- > ② Title "Galaxy" — 40px, weight 700, white, letter-spacing: -2px
- > ③ Subtitle "Powered by KNOX" — below the title in small grey text
- > ④ Username field — text input with label "USERNAME", placeholder "Enter username"
- > ⑤ Password field — password input with label "PASSWORD", placeholder "Enter password"
- > ⑥ Sign In button — full-width, orange-red gradient (see button details below)
- > ⑦ Forgot password? — text link below the Sign In button (see §2.1)

Input field style

- > Background — dark semi-transparent: `rgba(255,255,255,0.08)`
- > Border — 1px solid `rgba(255,255,255,0.15)`, turns orange-red on focus
- > Text colour — white · Placeholder — white at 35% opacity
- > Border-radius: 12px · Padding: 12px 14px · Font: Plus Jakarta Sans 14px

Sign In button

- > Background — gradient: `linear-gradient(160deg, #FF5A30 → #FF3F1F → #CC2200)`
- > Border — 1px solid `rgba(255,120,80,0.4)`
- > Text — white, weight 600, letter-spacing 0.02em · Border-radius: 12px
- > Width — 100% of box · Inner glow — subtle white highlight on top edge
- > Behaviour — clicking or pressing Enter triggers the login check

Error message

- > Text — "Wrong username or password."
- > Background — `rgba(220,60,50,0.25)` · Border — `rgba(255,120,100,0.3)`
- > Text colour — `#FFB4AA` · Border-radius: 12px · Hidden by default

Colour summary — Login page

- **Background** — `#000000` Pure black — deep space canvas
- Stars** — `#FFFFFF` White at 20-100% opacity — star points
- Box** — `#FFFFFF` White at 12% opacity — glass panel
- **Button start** — `#FF5A30` Orange-red gradient start
- **Button end** — `#CC2200` Deep red gradient end
- **Error text** — `#FFB4AA` Soft red — wrong credentials message

2.1 Forgot Password

The "Forgot password?" link appears below the Sign In button. Clicking it opens a dark glass modal panel over the login screen.

▲ Step 1 — Enter email

▲ Step 2 — Email sent confirmation

Step 1 — Reset Password modal

- › Title — "Reset Password" in 22px, weight 800, white
- › Description — instructions in small grey text
- › Email Address label — 10px, uppercase, grey
- › Email input — same dark glass style as login inputs, orange border on focus
- › "Send Reset Link" button — full-width, orange-red gradient matching Sign In
- › "Cancel" button — ghost style, subtle border, closes the modal
- › Backdrop click — clicking outside the panel also closes the modal

Validation

- › Empty field — shows inline error: "Please enter your email address."
- › Invalid format — shows inline error: "Please enter a valid email address."
- › Error appears in a red-tinted box above the email input

Step 2 — Email Sent confirmation

- › Green circle with envelope icon — confirms success
- › "Email Sent!" heading in 22px white
- › The entered email address shown in orange (#FF5A30)
- › Message — "Check your inbox and click the link to reset your password. The link expires in 30 minutes. Check spam if you don't see it."
- › "Back to Login" button — orange-red gradient, closes modal and returns to login

Modal style

- › Background — rgba(15,15,30,0.97) — very dark navy, near opaque
- › Border — 1px solid rgba(255,255,255,0.15) — subtle white border
- › Border-radius — 22px · Width — 380px max-width 92vw
- › Backdrop — rgba(0,0,0,0.75) with backdrop-filter: blur(8px)
- › Z-index — 99999 — always renders above everything including login screen

Note In the current version, Galaxy is a single-file system with no backend server. The "Send Reset Link" button confirms visually but does not send an actual email. Backend email integration is required for real password reset functionality.

3. System Layout

After logging in, the main application shell appears. The layout is consistent across all pages with three main areas.

Sidebar — left panel (222px wide)

- › Client block at top — logo image (36×36px, border-radius:10px), business name and category
- › Navigation links grouped into: Main, Inventory, Operations, Analytics, Settings
- › Active page highlighted with semi-transparent white background
- › Bottom footer — Galaxy logo, "Galaxy", "Retail Management", and Powered by KNOX

Topbar — 54px height

- › Page name — current page shown on the left
- › Live clock — date and time, updates every second
- › Alert bell — shows stock and order alerts count
- › User avatar and name — click for options

Content area

- › Background colour — light grey: #F2F2F7
 - › Scrollable — each page renders its content in white cards
 - › Padding — 22px top/bottom, 26px left/right
-

4. Dashboard

The first page after login. Shows a business performance overview for the selected time period.

▲ Galaxy Dashboard

Period filter

- › Today — figures for today only
- › Yesterday — figures for yesterday
- › This month — current calendar month (default)

Note The Revenue trend chart always shows the last 30 days regardless of the period selected.

Summary cards (4 cards)

- › Revenue — total income from delivered orders, with % change vs last month
- › Profit — revenue minus purchase cost, with profit margin %
- › Cancelled — number of cancelled orders with % of total
- › Returned — number of returned orders with % of total

Charts

- › Revenue trend — full-width line chart, last 30 days. Revenue in orange (#FF5A30), Profit in green (#16A34A)

Row 1 — Orders & Top Products (side by side)

- › Left — Orders donut chart (Orders — This Month): shows order breakdown by status for the selected period. Count legend displayed as a grid below the donut.
- › Right — Top Products table (Top Products — This Month): best-selling products by quantity for the selected period, with revenue per product. Max-height 240px with scroll.
- › Layout — two equal columns (1fr 1fr), gap 14px

Row 2 — Recent Orders & Stock Alerts (side by side)

- › Left — Recent Orders table: last 6 orders across all statuses — order code, customer name, amount, and status badge.
- › Right — Stock Alerts: products at or below the low-stock threshold. Out-of-stock shown in red (#E8220E), low stock in amber (#D97706).
- › Layout — two equal columns (1fr 1fr), gap 14px

Announcement slider

- › Image panel on the right — portrait 4:5 ratio (1080×1350px recommended)
 - › Auto-advances every 4 seconds with smooth slide transition
 - › Arrow buttons and dot indicators for manual navigation
-

5. Item Stock

Shows every product in the system as a table, with stock levels, pricing, and profit. This is the main inventory view used day to day.

The screenshot shows the 'Item Stock' page in the Galaxy system. It features a sidebar with navigation options like Dashboard, Add Product, Warehouses, Manage Orders, Place Order, Reports, Users, General, Help, and Billing. The main content area displays a table of products with the following columns: OFF/ON, IMAGE, PRODUCT NAME, PRODUCT CODE, AVAILABLE QUANTITY, SALES QUANTITY, SALES PRICE, PURCHASE PRICE, PROFIT (EACH ONE), WAREHOUSE, STOCK VALUE (PURCHASE PRICE), STOCK VALUE (SALES PRICE), and ADD DATE. The table lists 13 products, including Rice (kg), Sansscreen SP50, Vitamin C Serum, Floor Mop Pro, A4 Notebook, Hand Cream 100ml, Biscuits Pack (200g), Floor Mop, Mito 400g, Earphones (Generic), and Samsung USB Charger. Each row includes a checkbox for deletion, a toggle switch for visibility, a product image, and various pricing and quantity details.

▲ Item Stock Page — full table view

Toolbar

- Add Product button — top left, navigates to the Add Product page
- Search bar — filter by product name or code in real time
- Stock History button — top right, opens a slide-in panel showing every stock event across all products (see §5.5)
- Delete icon — top right, becomes active once at least one product is checked using the row checkboxes

Table columns (14 total)

#	Column	Description
1	Checkbox	Select one or more rows to enable the Delete button
2	OFF/ON	Toggle switch — turns the product visible or hidden in Place Order without deleting it
3	Image	Product thumbnail photo
4	Product Name	Sortable. Hovering a row reveals the action buttons below the name (see §5.3)
5	Product Code	Sortable. The unique product code/SKU
6	Available Quantity	Sortable. Total stock remaining across all warehouses combined. Shown in orange when low.
7	Sales Quantity	Sortable. Total units sold to date
8	Sales Price	Sortable. The price charged to customers (LKR)
9	Purchase Price	The cost price paid to acquire the product (LKR)
10	Profit (Each One)	Sortable. Sales Price minus Purchase Price, shown in green

11	Warehouse	Stock breakdown per warehouse shown inline, e.g. "Main:25 · Galle:15 · Kandy:2"
12	Stock Value (Purchase Price)	Available Quantity × Purchase Price — the total cost value of remaining stock
13	Stock Value (Sales Price)	Available Quantity × Sales Price — the total potential revenue if all remaining stock sells
14	Add Date	The date the product was first added to the system

Note There is no separate warehouse filter dropdown above the table. Instead, stock per warehouse is shown directly inside the Warehouse column for every product, so all locations are visible at once without needing to filter.

Stock level colour coding

- **Black** — #18182B Normal — healthy stock level (Available Quantity column)
- **Amber** — #D97706 Low stock — quantity shown in amber/orange when at or below the low-stock threshold

5.3 Row actions (hover menu)

Hovering over any product row reveals four action buttons directly beneath the product name: View product, Edit product, Chart, and Refill stock.

① View product

Opens a read-only popup with the full product summary.

▲ *View Product popup*

- > Product image — large preview at the top
- > Product Code and Status (Active/Inactive)
- > Selling Price and Purchase Price
- > Profit Each and Total Stock — combined across all warehouses
- > Warehouse Stock breakdown — units in each warehouse listed individually
- > Stock Value (Purchase) and Stock Value (Selling) — calculated totals
- > Added date and total units Sold to date — shown at the bottom

② Edit product

Opens the same form used for adding a product (see §6), pre-filled with this product's current details, so existing information can be changed and saved.

Submit

▲ [Edit Product](#) — pre-filled Add Product form

- › Product Images — existing image shown, new images can be added (up to 5)
- › Product Information — name, description, product code (with Regenerate option)
- › Pricing — purchase price and selling price
- › Product status — Off/On toggle to activate or deactivate the product
- › Warehouse Quantities — current stock per warehouse, editable
- › Selling Details — auto-calculated, read-only: profit, stock value, total quantity
- › Submit — saves all changes

③ Chart

Opens a popup showing this product's sales trend for the last 7 days, with a quick link through to the full Reports page.

▲ Chart popup — Sales Trend Last 7 Days

Popup layout — top to bottom

- > Header row — small product thumbnail (40×40px) on the left, product name and product code stacked beside it, and a close (x) button on the far right
- > Section label — "SALES TREND — LAST 7 DAYS" in small bold red uppercase text
- > Summary line — grey text showing the total number of units sold across the 7-day window, e.g. "14 units sold in last 7 days"
- > Chart area — a fixed-height canvas (220px tall) containing the bar chart
- > "View more insight" button — full-width orange-red gradient button with a right-pointing arrow icon, placed at the very bottom

Chart type and axes

- > Chart type — vertical bar chart
- > X axis (horizontal) — the last 7 calendar days, shown as DD.MM date labels, ordered oldest (left) to newest/today (right)
- > Y axis (vertical) — Sales Quantity, i.e. the number of units of this product sold on that day
- > Bar colour — solid orange (#FF5A30), rounded corners, single dataset labelled "Units sold"
- > Hovering a bar shows a tooltip with the exact unit count for that day

How the data is calculated

- > Scans every order dated within the last 7 days
- > Orders with status Cancelled or Refunded are excluded from the count

- › Matches order line items to this product by product code, then sums the quantities
- › The 7 daily totals are also summed for the "units sold in last 7 days" summary line

Buttons in this popup

- › × (close) — top right corner, closes the popup and returns to the Item Stock table
- › View more insight — closes the popup, navigates to the Reports page, and automatically opens the Orders tab for deeper sales analysis

④ Refill stock

Opens the Add Stock popup — the main way to add new inventory to an existing product.

▲ Refill Stock popup

- › Product summary — name, SKU, and current total stock shown at the top
- › Current Purchase Price and Current Selling Price — shown for reference
- › Add to warehouse — dropdown to choose which warehouse receives the new stock, with each warehouse's current quantity shown
- › Quantity to add — number stepper with – and + buttons
- › Purchase price and Selling price — each has a "Same" toggle to keep existing prices, or enter new prices for this batch
- › Add Stock — confirms and adds the entered quantity to the selected warehouse. The event is logged in Stock History as a "REFILL" entry.

5.5 Stock History panel

Clicking the "Stock History" button in the toolbar opens a slide-in panel on the right showing a timeline of every stock movement across all products.

The screenshot shows the Galaxy Stock History panel. The main table lists products with their stock levels, and the right panel shows a detailed history of stock movements.

OPTION	IMAGE	PRODUCT NAME	PRODUCT CODE	AVAILABLE QUANTITY	SALES QUANTITY	SALES PRICE	PURCHASE PRICE	PROFIT (EACH ON)
☐		Rice (5kg)	RC005	60	2,100	LKR 1,600	LKR 1,100	LKR 500

▲ Stock History panel

Each history entry shows

- › Event type badge — INITIAL STOCK, REFILL, or TRANSFER, colour-coded
- › Product name and product code
- › Date and time of the event
- › Quantity change — shown with + for additions and – for transfers out
- › Warehouse — which location the stock was added to or moved from
- › Purchase price and Selling price at the time of the event

5.6 Delete

To delete one or more products: tick the checkbox next to each product to remove, then click the delete (trash) icon at the top right of the toolbar. A confirmation prompt appears before the product is permanently removed.

Note Delete permanently removes the product and its stock records. This action is restricted to Owner and Manager roles.

6. Add Product

Use this page to add new products to the inventory. The page is split into a left column for product details and a right column for stock and status.

▲ Add Product Page

Required fields

- › Product name — must not be empty
- › Purchase price — must be greater than 0
- › Selling price — must be greater than 0
- › Total quantity — at least one warehouse must have a quantity greater than 0. If every warehouse is left at 0, the system blocks submission with "Total quantity is 0 — please add stock to at least one warehouse."

Optional fields

- › Product description — short notes about the product
- › Low stock alert threshold — defaults to 5 units if left blank

6.1 Product Images

A maximum of 5 images can be added per product.

▲ *Product Images uploader*

- › The first image in the row is always the main/default image and is marked with a red "DEFAULT" badge
- › Click the dashed + tile to open the file picker and add a new image
- › Images can be reordered by clicking and dragging a thumbnail to a new position — dragging any image into the first position makes it the new default/main image
- › Hovering an image reveals a small delete (×) icon in its corner to remove that image
- › A counter below the images shows progress, e.g. "0 / 5 images". Once 5 images are added, the + tile disappears and the counter turns red.

6.2 Product Code

- › The code is auto-generated as soon as a Product Name is typed — built from the first 3 letters of the name plus a random 4-digit number, e.g. "Sunscreen SPF50" → "SUN4821"
- › The code field remains fully editable — typing in it manually overrides the auto-generated value
- › Once edited manually, the code will no longer auto-update if the product name is changed afterward
- › "🔄 Regenerate" button — generates a brand new random code from the current product name at any time, overriding any manual edit
- › Helper text below the field: "Auto-generated from name. You can edit manually."

6.3 Pricing

- › Purchase price (LKR) — the cost price, required
- › Selling price (LKR) — the price charged to customers, required

6.4 Product status — On/Off toggle

Located at the top of the right column. Controls whether the product is active and available for sale.

- › On (default, shown in red/orange when active) — the product is active and will appear when placing orders
- › Off (shown in grey when inactive) — the product is hidden from Place Order but still exists in Item Stock for record-keeping
- › Helper text: "Active product will appear in sales"

6.5 Warehouse Quantities

One number field per warehouse, each labelled with the warehouse name and its location in smaller grey text (e.g. "Main Store — Colombo 03"). Defaults to 0. Minimum value is 0 — negative numbers cannot be entered.

6.6 Selling Details (auto-calculated)

A read-only summary box that updates instantly as prices and quantities are entered:

- › Profit (Each one) — Selling price minus Purchase price
- › Stock value (Purchase) — Total quantity × Purchase price
- › Stock value (Selling) — Total quantity × Selling price
- › Total quantity — sum of all warehouse quantities combined

6.7 Buttons

Button	Action
↻ Regenerate	Generates a new random product code based on the current product name, replacing whatever is in the Product Code field
Submit	Validates all required fields. If validation fails, shows the red error box and stops. If validation passes, adds the product to Item Stock, shows a success toast, and clears the form for the next entry.

6.8 Error and warning notes

Two colour-coded note boxes can appear above the Submit button, depending on what is entered in the form.

Red note — blocking errors

▲ Red error note box

- › Border — dashed red (#E8220E)
- › Background — light red/pink (#FFF8F6)
- › Title — "CANCEL ADD PRODUCT — FIX THESE FIRST" in bold red uppercase, with a warning circle icon
- › Lists every missing or invalid required field as a bullet point, e.g. "Product name is required.", "Purchase price is required — please add the purchasing price.", "Selling price is required.", "Total quantity is 0 — please add stock to at least one warehouse."
- › While this red note is showing, the product cannot be submitted — clicking Submit re-checks and re-displays the same errors

Yellow note — non-blocking warning

The screenshot shows the 'Add Product' form in the Galaxy Retail Management system. The form is divided into several sections: 'PRODUCT INFORMATION', 'SELLING DETAILS', and 'PRICING'. The 'PRICING' section shows a purchase price of 500 LKR and a selling price of 400 LKR. A yellow warning note is displayed at the bottom right of the form, indicating that the selling price is lower than the purchase price, resulting in a loss. The note is titled 'CANNOT ADD PRODUCT — FIX THESE FIRST' and includes a warning icon (a triangle with an exclamation mark).

▲ Yellow warning note example

- › Border — dashed amber/orange (#D08020)
- › Background — light yellow (#FFFCF0)
- › Title — "WARNING — YOU CAN STILL SUBMIT" in bold amber uppercase, with a triangle warning icon
- › Appears when Selling price is lower than Purchase price: "Selling price is lower than purchase — this product will run at a loss."
- › Also appears when Selling price equals Purchase price: "Selling price equals purchase price — profit will be zero."
- › This is a caution only — the product can still be submitted and saved despite this warning

Note Both note boxes update live as the form is filled in, and automatically hide once their condition is resolved.

7. Warehouses

Manage multiple storage locations, see stock per location, and move stock between warehouses.

▲ Warehouses Page — main view

7.1 Top summary cards

Four cards across the top give a network-wide snapshot before drilling into any single warehouse:

Card	Shows
Total on-hand	The combined stock quantity across every warehouse, with a small note "Across all locations"
Active warehouses	The number of warehouses currently marked active (visible in transfers and orders), with "Across network"
Low stock alerts	Count of products that are at or below their low-stock threshold (combined across all warehouses), with "Need attention"
In-transit transfers	Count of stock transfers currently in progress. Clicking this card opens the transfers panel. Shows "View all →".

7.2 Transfer stock button

Located top-right of the page, next to Add warehouse. Opens a popup to move stock from one warehouse to another.

▲ *Transfer stock popup*

Popup fields

- > From — dropdown to choose the source warehouse
- > ⇄ swap icon — click to instantly swap the From and To warehouses
- > To — dropdown to choose the destination warehouse
- > Products — a list of items being transferred, empty by default with the message "No products added yet — use the Add New Item button below."
- > Product search/select field — search and pick a product by code and name (e.g. "GB350 — Samsung USB Charger")
- > "+ Add New Item" button — adds the selected product to the transfer list with a quantity field
- > Cancel — closes the popup without making any change
- > "⇄ Confirm transfer" — moves the entered quantities from the source warehouse to the destination warehouse instantly; stock levels update immediately on both warehouses

Note *Transfer stock can also be opened pre-filled for one specific warehouse — either by clicking the Transfer button on a warehouse detail page, or the small Transfer icon next to any individual product row inside a warehouse's product table.*

7.3 Add warehouse button

Located top-right of the page. Opens a popup to create a new storage location.

▲ Add warehouse popup

Popup fields

- › Warehouse status — On/Off toggle. On (default) means the warehouse appears as an option in transfers and orders. Off hides it from those choices.
- › Warehouse name — e.g. "North DC"
- › Code — a short identifier, e.g. "NOR"
- › Location — free text, e.g. "City, State"
- › Type — e.g. Distribution, Retail, Storage
- › Capacity (units) — the maximum stock capacity used to calculate the fill percentage shown on warehouse cards
- › Cancel — closes the popup without creating anything
- › "✓ Create warehouse" — saves the new warehouse, which then appears as a card on the main page and as a new stock field option on Add Product and Edit Product

7.4 Warehouse card (grid view)

Each warehouse appears as a card below the 4 summary cards. Clicking anywhere on a card opens that warehouse's detail view.

What each card shows

- › Coloured initials badge (e.g. "MS" for Main Store) on a dark square
- › Warehouse name and location, e.g. "Main Store — Colombo 03"
- › Units — total stock quantity currently held in that warehouse
- › SKUs — number of distinct products stocked there
- › Low — number of products at or below the low-stock threshold for that warehouse, shown in red
- › A thin progress bar with a percentage — shows how full the warehouse is relative to its set Capacity (units total ÷ capacity)
- › "View stock →" link — same action as clicking the card, opens the detail view
- › An extra dashed "+ Add warehouse" card always sits at the end of the grid as a shortcut to the Add warehouse popup

7.5 Warehouse detail view

Opened by clicking any warehouse card or its "View stock" link. Shows every product stocked in that specific warehouse.

▲ Warehouse detail view — Main Store

Header card

- > "< All warehouses" link — returns to the main warehouse grid
- > Coloured initials badge, warehouse name, and an ACTIVE/INACTIVE status pill
- > Location and Manager shown in small grey text below the name
- > On hand — total units in this warehouse
- > low — count of low-stock products here, in red
- > Progress bar and percentage — capacity fill level
- > Edit button — opens the Edit warehouse popup (see §7.6)
- > Transfer button — opens Transfer stock pre-filled with this warehouse as the source

Toolbar

- > Filter products... search box — filters the table below by product name or code
- > "Low stock only" checkbox — shows only products at or below their threshold in this warehouse
- > "Name A→Z" sort button — click to toggle sorting by product name ascending/descending
- > Item count — shows how many products match the current filter, e.g. "13 items"

Product table columns

Column	Description
SKU	Product code, shown in red
Product	Product name
Category	Product category if set, otherwise shows —

On Hand	Quantity physically in this warehouse
Available	Quantity available to sell from this warehouse
Reorder pt.	The product's low-stock threshold
Stock val (Purchase)	On Hand × Purchase price for this warehouse only
Stock val (Sale)	On Hand × Selling price for this warehouse only
Added date	Sortable — click the column header to sort by date added
Status	Colour-coded pill: green "In stock", amber "Low", or red "Out"
(action)	Small "Transfer" button — opens Transfer stock pre-filled with this warehouse and this exact product already selected

7.6 Edit warehouse popup

Opened from the Edit button on a warehouse's detail page.

▲ *Edit warehouse popup*

- > Warehouse status — On/Off toggle, same as in Add warehouse
- > Warehouse name and Code — editable
- > Location — editable
- > Manager — optional, name of the person responsible for this warehouse
- > Type — editable (Distribution, Retail, Storage, etc.)
- > Cancel — closes without saving
- > "Save changes" — updates the warehouse with the new details

8. Manage Orders

Central hub for tracking all customer orders from start to finish.

The screenshot shows the 'Home > Manage Orders' dashboard. At the top, there are status cards for Processing (12), Ready to Ship (8), Delivering (5), Delivered (51), Cancelled (14), Returned (8), and Refunded (2). Below these are summary cards for Total orders (100), Revenue (delivered) (LKR 321,630), and Cancelled orders (14). A table of orders is displayed below, with columns for Order / Product, Order Code, Date & Time, Status, Purchase Price, Sale Price, Qty, Profit, and Added By. The table lists 11 orders, including items like Hand Cream 100ml, Phone Stand, Water Bottle 1L, Cotton T-Shirt (M), Earphones (Generic), and Rice 5kg.

ORDER / PRODUCT	ORDER CODE	DATE & TIME	STATUS	PURCHASE PRICE	SALE PRICE	QTY	PROFIT	ADDED BY
Hand Cream 100ml Priya Fernando - Matara	ORD-001	21.01.2026 08:47	Refunded	LKR 500	LKR 840	2	LKR 340	Nimal Staff
Phone Stand Ruwani Rajapaksa - Negombo	ORD-002	14.01.2026 08:05	Delivered	LKR 1,750	LKR 3,100	5	LKR 1,350	Nimal Staff
Water Bottle 1L Ruwani Rajapaksa - Negombo	ORD-003	21.06.2026 16:26	Returned	LKR 770	LKR 1,330	3	LKR 560	Admin Owner

▲ Manage Orders — main view

8.1 Status cards (clickable filters)

The 7 cards across the top — Processing, Ready to Ship, Delivering, Delivered, Cancelled, Returned, Refunded — are not just counters. Clicking any card filters the table below to show only orders with that status.

The screenshot shows the 'Home > Manage Orders' dashboard with the 'Delivered' status card selected. The table below displays only orders with a 'Delivered' status. The table has columns for Order / Product, Order Code, Date & Time, Status, Purchase Price, Sale Price, Qty, Profit, and Added By. The table lists 9 orders, including items like Phone Stand, Earphones (Generic), Milo 400g, Phone Stand, Samsung USB Charger, Water Bottle 1L, A4 Notebook, and Earphones (Generic).

ORDER / PRODUCT	ORDER CODE	DATE & TIME	STATUS	PURCHASE PRICE	SALE PRICE	QTY	PROFIT	ADDED BY
Phone Stand Ruwani Rajapaksa - Negombo	ORD-002	14.01.2026 08:05	Delivered	LKR 1,750	LKR 3,100	5	LKR 1,350	Nimal Staff
Earphones (Generic) Ruwani Rajapaksa - Negombo	ORD-006	23.01.2026 08:42	Delivered	LKR 1,700	LKR 2,880	5	LKR 1,180	Admin Owner
Earphones (Generic) Priya Fernando - Matara	ORD-007	12.03.2026 11:42	Delivered	LKR 4,800	LKR 7,880	10	LKR 3,080	Nimal Staff
Milo 400g Ranjana Perera - Galle	ORD-009	16.04.2026 18:29	Delivered	LKR 4,250	LKR 6,850	10	LKR 2,600	Nimal Staff
Phone Stand Shanika Jayawardena - Colombo	ORD-011	13.04.2026 17:29	Delivered	LKR 2,850	LKR 4,870	6	LKR 2,020	Saman Manager
Samsung USB Charger Chamara Silva - Kandy	ORD-013	12.02.2026 16:49	Delivered	LKR 4,900	LKR 8,100	5	LKR 3,200	Admin Owner
Water Bottle 1L Shanika Jayawardena - Colombo	ORD-016	03.03.2026 08:37	Delivered	LKR 900	LKR 1,500	2	LKR 600	Admin Owner
A4 Notebook Shanika Jayawardena - Colombo	ORD-017	03.01.2026 13:04	Delivered	LKR 640	LKR 1,160	4	LKR 520	Nimal Staff
Earphones (Generic) Thilini Gunasekara - Jaffna	ORD-019	15.06.2026 08:43	Delivered	LKR 4,800	LKR 7,750	6	LKR 2,950	Saman Manager

▲ Table filtered by clicking the Delivered card

- › Each card shows the status name, the live count of orders in that status, and a thin progress bar showing that status's share of total orders
- › Clicking a card highlights it with a coloured border matching the status colour, and the product table instantly filters to that status only
- › Clicking the same card again removes the filter and returns the table to showing all orders
- › When a status filter is active, a small chip appears next to the Date range button (e.g. "× Delivered") — click it to clear the filter the same way
- › Three additional summary cards sit below the status cards: Total orders, Revenue (delivered), and Cancelled orders — these are informational only and not clickable

8.2 Date range button

Located top-right of the page, above the table. Filters both the status cards and the table to a specific date window.

▲ *Date range popup*

Popup contents

- › Left panel — quick presets: Today, Yesterday, Today and yesterday, Last 7 days, Last 14 days, Last 28 days, Last 30 days, This week, Last week, This month, Last month, Maximum, and Custom
- › Right panel — a two-month calendar (current month and next month) for manually picking a from/to date range by clicking two dates
- › Selected range is shown below the calendar, e.g. "Selected: 18.06.2026 — 18.06.2026"
- › Note — "Dates are shown in Colombo Time"
- › Cancel — closes the popup without applying any change
- › Update — applies the selected date range to the page

Once a range is applied, the button label changes to "Change range" and a "× Clear" button appears beside it to remove the filter and return to "All time".

8.3 Add Order button

Located top-left above the table, styled as a solid orange-red button. Clicking it navigates directly to the Place Order page (see §9) to create a new order from scratch.

8.4 View Order popup

Opened by clicking "View order" from a row's hover action menu, or by clicking an order row. Shows the complete order breakdown.

▲ Order Details popup

Popup contents

- › Header — order code (e.g. "ORD-001"), date and time, who added the order, and the current status badge
- › Products — every item in the order with quantity, unit price, and line total, plus the order's total Profit shown in green
- › Customer box — name, phone number, and delivery address
- › Order Info box — Delivery method, Payment method, and Discount percentage applied
- › Reason — shown in an orange highlight box if the order was cancelled, returned, or refunded with a reason on record
- › Totals — Items total, Purchase total (cost), and the final Total in red
- › Footer note — "Edit are only available for Processing orders." explaining why the Edit option may not be available on this order

8.5 Status colours

Status	Colour	Meaning
Processing	#F59E0B (amber)	Team is preparing the order
Ready to Ship	#3B82F6 (blue)	Packed, waiting for courier
Delivering	#8B5CF6 (purple)	With the delivery person
Delivered	#16A34A (green)	Customer received — counted in revenue
Cancelled	#E8220E (red)	Cancelled before delivery
Returned	#DC2626 (dark red)	Customer returned after receiving
Refunded	#9090B8 (grey)	Refund issued to customer

Each status appears as a coloured dropdown badge directly in the table's Status column. Clicking the badge opens the Change Status popup.

▲ Change status popup

- › Select new status — dropdown listing the next valid status options, with a short description below (e.g. "With delivery person")
- › Cancel — closes without changing anything
- › Confirm — applies the new status to the order immediately

8.6 Table columns

Column	Description
Order / Product	Shows the first product name in the order, with customer name and city below it. Hovering reveals the row action menu (View order, etc.)
Order code	The unique order ID, e.g. ORD-001
Date & Time	When the order was placed
Status	Coloured clickable badge — opens the Change Status popup (see §8.5)
Purchase price	Total cost price for all items in the order
Sale price	Total selling price for all items in the order
Qty	Total quantity of items in the order

Profit	Sale price minus Purchase price, shown in green
Added by	The staff member who created the order

8.7 Column sorting

Note Column sorting (click a column header to sort the table by that column) is not currently built into the Manage Orders table. This is a planned addition — column headers will become clickable to sort by Date, Status, Sale price, Qty, or Profit in either ascending or descending order.

9. Place Order

Create a new order on behalf of a customer. The page is split into a left column (Product Details, Customer Details, Delivery/Payment/Discount) and a right column (Order Details and Pricing Details).

The screenshot shows the 'Place Order' interface. On the left is a dark sidebar with navigation links. The main content area has a header 'Home > Place Order'. The form is split into two columns. The left column has three sections: 'PRODUCT DETAILS' with a '+ Add New Item' button, 'CUSTOMER DETAILS' with various input fields, and a section for 'Delivery method', 'Payment method', and 'Discount code'. The right column has 'ORDER DETAILS' and 'PRICING DETAILS' sections. A 'Submit' button is at the bottom right of the pricing section. The subtotal is displayed as 'LKR 0'.

▲ Place Order — empty form

9.1 Add New Item button

Located at the top of the Product Details card. Clicking it reveals a search field used to find and add products to the order.

This screenshot shows the same 'Place Order' form, but with the '+ Add New Item' button clicked. A search field is now visible within the 'PRODUCT DETAILS' section, allowing the user to search for products by name or SKU.

▲ Add New Item — search field revealed

- Click "+ Add New Item" to open the "Product Name or SKU" search box
- Type any part of a product's name or its SKU code to search

Search results

The screenshot shows the 'Place Order' form in the Galaxy application. The 'PRODUCT DETAILS' section displays a search result for 'Rice' with a unit price of LKR 3,600. The 'CUSTOMER DETAILS' section includes fields for Customer Name, Address, City, Phone Number, and Email. The 'PRICING DETAILS' section shows a subtotal of LKR 0. A red 'Submit' button is at the bottom right.

▲ Search results dropdown while typing "Rice"

- Each result shows the product thumbnail, name, SKU code, current stock count, and price
- Click a result to add that product to the order

Item card — once a product is added

The screenshot shows the 'Place Order' form with an item card for 'Samsung USB Charger' (SKU: CB250) added. The item card displays a unit price of LKR 850 and a line total of LKR 850. The 'CUSTOMER DETAILS' and 'PRICING DETAILS' sections are also visible. A red 'Submit' button is at the bottom right.

▲ Item card after adding a product

- Red × button on the left — removes this item from the order entirely
- Product thumbnail, name, and SKU — shown at a glance
- Quantity stepper — minus button, a typeable number field, and a plus button to increase or decrease the quantity. Typing directly into the number field also works.
- Unit price row — shows the product's current selling price with an "Edit" button beside it
- Line total — shown on the right (unit price × quantity)
- "+ Add New Item" — appears again below the item list so more products can be added to the same order

Editing the unit price

The screenshot shows the 'Place Order' page in the Galaxy system. The left sidebar contains navigation links: Dashboard, Item Stock, Add Product, Warehouses, Manage Orders (selected), Reports, Users, General, Help, and Billing. The main content area is titled 'Home > Place Order'. It features three main sections: 'PRODUCT DETAILS', 'CUSTOMER DETAILS', and a 'SUBTOTAL' section. The 'PRODUCT DETAILS' section shows a 'Samsung USB Charger' with a unit price of '850' (LKR 850) and a 'Reset' button. A red dashed box highlights the 'Unit price' field, which is in edit mode. The 'CUSTOMER DETAILS' section includes fields for Customer Name, Address, Select city, Phone Number 01, Phone Number 02 (Optional), Email (Optional), and Special note (Optional). The 'SUBTOTAL' section shows a 'Subtotal' of 'LKR 850'. On the right, the 'ORDER DETAILS' section shows Order ID #001001, Date 18.06.2026, Time 11:53, Placed By Admin Owner, and Pricing Details: Samsung USB Charger x1 (LKR 850), Delivery charge (LKR 0), Discount (LKR 0), and Total (LKR 850). A red 'Submit' button is at the bottom right.

▲ Unit price in edit mode

- › Clicking "Edit" next to Unit price turns it into an editable number field outlined in red, so a custom price can be typed in for this order only
- › A "Reset" button appears next to the field — click it to revert back to the product's normal selling price
- › The line total and the Pricing Details on the right update instantly as the price or quantity changes

Note If a product has sibling variants sharing the same parent code (e.g. different package sizes or batches), the item card instead shows a row of "Price batch" pills allowing you to switch between those specific variants, instead of the Edit/Reset price option.

9.2 Delivery method, Payment method, and Discount code

These three fields appear in a card near the bottom of the left column. Their available options are configured on the General Settings page (see §12) — they are not typed freely here, but chosen from what has already been set up.

▲ General Settings — where these options are configured

How to add or manage the options

- Go to General (left sidebar) → Business Info card
- Delivery methods — listed with a name and a delivery charge (LKR) next to each. Click "+ Add method" to add a new one, or the red × to remove one.
- Payment methods — shown as removable tags (e.g. Cash, Card, Bank Transfer). Type a new method name in the box and click "+ Add" to add it, or click the × on a tag to remove it.
- Discount codes — listed with a code, a % or fixed-amount type, and a value. Click "+ Add code" to create a new discount code, or the red × to remove one.
- Click "✓ Save settings" at the bottom of the General page after making changes

Once saved, these become available as selectable options on the Place Order page:

- Delivery method — selecting one automatically adds its configured delivery charge to the Pricing Details
- Payment method — a simple dropdown selection, no automatic calculation
- Discount code — typed into the Discount code field; if it matches a code configured in General Settings, the discount is applied automatically to the Pricing Details

9.3 Order Details and Pricing Details (right column)

This column updates live as items are added and details are filled in on the left.

Order Details

- › Order ID — automatically generated, shown in red, e.g. "#001001"
- › Date — today's date, filled automatically
- › Time — the current time, filled automatically
- › Placed By — the name of the logged-in staff member creating the order

Pricing Details

- › Each added product is listed by name with its quantity and line total, e.g. "Samsung USB Charger x1 — LKR 850"
- › Delivery charge — filled in automatically based on the selected Delivery method
- › Discount — shown in green, calculated automatically if a valid discount code is entered
- › Total — the final order amount in red, bold, at the bottom: items + delivery charge – discount

A matching Subtotal is also shown at the bottom of the left column, just above the Submit button, for a quick reference while still editing the order.

9.4 Select city

A dropdown field in Customer Details listing Sri Lankan cities and towns to choose from, instead of typing the city manually. The list currently includes 105 locations. Below it is organised by Province → District → Towns, which is the clearest way to check the list for accuracy and spot anything missing.

Western Province

- › Colombo District: Colombo, Dehiwala, Moratuwa, Sri Jayawardenepura Kotte, Kaduwela, Maharagama, Nugegoda, Piliyandala, Avissawella, Hanwella
- › Gampaha District: Negombo, Gampaha, Ja-Ela, Katunayake, Wattala, Ragama, Minuwangoda, Divulapitiya, Mirigama, Nittambuwa, Veyangoda, Kiribathgoda, Kelaniya, Peliyagoda, Kadawatha, Biyagama
- › Kalutara District: Kalutara, Panadura, Horana, Matugama, Bandaragama, Ingiriya, Agalawatta, Aluthgama, Bentota, Beruwala, Paiyagala, Wadduwa

Central Province

- › Kandy District: Kandy
- › Matale District: Matale, Dambulla, Sigiriya
- › Nuwara Eliya District: Nuwara Eliya, Hatton

Southern Province

- › Galle District: Galle, Ambalangoda, Hikkaduwa, Elpitiya, Baddegama
- › Matara District: Matara, Akuressa, Deniyaya, Dickwella, Weligama, Mirissa
- › Hambantota District: Hambantota, Tangalle, Tissamaharama

Northern Province

- › Jaffna District: Jaffna, Point Pedro, Chavakachcheri
- › Kilinochchi District: Kilinochchi
- › Mannar District: Mannar
- › Vavuniya District: Vavuniya
- › Mullaitivu District: Mullaitivu

Eastern Province

- › Batticaloa District: Batticaloa, Kattankudy
- › Ampara District: Ampara, Akkaraipattu, Kalmunai
- › Trincomalee District: Trincomalee, Muttur, Kantale

North Western Province

- › Kurunegala District: Kurunegala, Kuliyaipitiya, Wariyapola, Nikaweratiya, Alawwa, Narammala
- › Puttalam District: Puttalam, Chilaw, Dankotuwa, Wennappuwa, Marawila, Nattandiya

North Central Province

- › Anuradhapura District: Anuradhapura, Tambuttegama, Medawachchiya
- › Polonnaruwa District: Polonnaruwa, Habarana

Uva Province

- › Badulla District: Badulla, Bandarawela, Haputale, Ella, Welimada
- › Monaragala District: Monaragala, Bibila

Sabaragamuwa Province

- › Ratnapura District: Ratnapura, Embilipitiya, Pelmadulla, Balangoda, Eheliyagoda
- › Kegalle District: Kegalle, Mawanella, Rambukkana

This list was cross-checked against the official Local Authorities of Sri Lanka, sourced district-by-district from the Election Commission's 2025 Local Authorities Election results (election.adaderana.lk). All 25 districts were checked. The notable well-known towns missing from each district are listed below — minor administrative sub-divisions are not included here to keep this practical for everyday delivery use.

Confirmed missing towns, by district

- › Colombo: Boralessgamuwa, Homagama, Kesbewa, Kolonnawa, Kotikawatte (Mulleriyawa), Seethawaka, Seethawakapura
- › Gampaha: Attanagalle, Dompe, Katana, Mahara
- › Kalutara: Bulathsinhala, Dodangoda, Madurawala, Millaniya, Palindanuware, Walallawita
- › Kandy: only "Kandy" itself was in the list; the district has 21 official local authority areas — notable missing towns include Gampola, Nawalapitiya, Akurana, Wattegama, Kadugannawa
- › Matale: reasonably well covered already (Matale, Dambulla, Sigiriya present)
- › Nuwara Eliya: Talawakele-Lindula, Maskeliya, Ginigathena, Kotagala, Walapane
- › Galle: Karadeniya
- › Matara: Kamburupitiya, Devinuwara, Hakmana
- › Hambantota: Weeraketiya
- › Jaffna: Valvettithurai
- › Kilinochchi, Mannar, Vavuniya, Mullaitivu: small districts, main town already covered
- › Batticaloa: Eravur
- › Ampara: Dehiattakandiya, Pottuvil
- › Trincomalee: Kinniya
- › Kurunegala: Mawathagama, Polgahawela
- › Puttalam: Kalpitiya

- > Anuradhapura: Mihintale
- > Polonnaruwa: reasonably well covered already (Hingurakgoda present)
- > Badulla: reasonably well covered already (Mahiyanganaya present)
- > Monaragala: Kataragama, Wellawaya
- > Ratnapura: Kahawatta, Kuruwita
- > Kegalle: Warakapola, Ruwanwella, Deraniyagala, Aranayake

Note *This is a documentation review only; the actual Select city dropdown in Galaxy.html has not been changed, since no HTML edit was requested. If these towns should be added to the live dropdown, that can be done as a separate HTML update whenever convenient.*

10. Reports

Detailed analytics across five tabs — Orders, Stock, Customers, Users, and Finance. Click any tab at the top of the page to switch the view. All figures update live based on the data already in the system.

10.1 Orders tab

▲ Reports — Orders tab

Sales chart

- › "By Qty" / "By Revenue" toggle — switches what the chart and the cards below it measure
- › Product search box — type a product name to filter the chart to just that product; a dropdown of matches appears while typing, and a × button clears the search once applied
- › Legend checkboxes — in By Qty mode, one tickable line per order status (Processing, Ready to Ship, Delivering, Delivered, Cancelled, Returned, Refunded); in By Revenue mode, three tickable lines instead: Revenue, Cost, Profit. Unticking a checkbox hides that line from the chart.
- › Date range button — opens the same date range popup used elsewhere (see §8.2) to restrict the chart to a specific period; a × Clear option appears once a range is set
- › Chart type — line chart
- › X axis — dates across the selected period (or full order history if no range is set)
- › Y axis — either unit quantity sold (By Qty mode) or LKR amount (By Revenue mode), depending on the toggle

Stat cards below the chart

- › In By Qty mode: 7 cards, one per order status, each showing the order count, units sold, and a thin progress bar showing that status's share of total orders in the selected period

- › In By Revenue mode: 3 cards instead — Total revenue, Total cost, and Total profit (with profit margin % shown underneath)

Cancelled & Returned trend

- › A line chart with its own independent Date range button
- › X axis — dates, automatically grouped by day, week, or month depending on how wide the selected range is (day-level for up to 31 days, weekly up to 90 days, monthly beyond that)
- › Y axis — number of orders
- › Two lines: Cancelled (orange) and Returned (dark navy)

Cancelled & Returned — reasons table

- › Lists every order currently in Cancelled, Returned, or Refunded status
- › Columns: Order code, Status badge, Customer name, Reason (the reason text recorded when the status was changed), and Date
- › Shows "No cancelled or returned orders" if the list is empty

Top 4 cards

- › Total products — count of all products in the system, as of today's date
- › Stock purchase value — total cost value of all stock currently on hand (quantity × purchase price, summed)
- › Stock selling value — total potential revenue if all current stock sold at listed price
- › Low stock items — count of products at or below their reorder threshold

Stock value by product table

- › Columns: Product, SKU, Qty on hand, Purchase price, Selling price, Purchase value, Selling value, Potential profit — each numeric column header is sortable (small ↑ arrow icon)

Low stock products

- › Lists every product currently at or below its reorder point, with Product, SKU, Stock, and Reorder pt. columns

Dead stock (never sold)

- › Lists products that have never appeared in any delivered order, with Product, SKU, Units, and Cost value — useful for spotting stock that isn't moving

Stock movement history

- › A chronological log of every stock change: Date, Time, Type (refill or transfer, shown as a small coloured tag), Product, Qty (shown with a + prefix), Purchase price, Selling price, and Warehouse

▲ Reports — Customers tab

Top 4 cards

- › Total customers — count of unique customers (matched by phone number)
- › Returning customers — count of customers with more than one order, with a % of total underneath
- › Top city — the city generating the most revenue, with its revenue figure shown underneath
- › Avg spend / customer — total revenue divided by total customers

Orders by city

- › A ranked table of cities by order count and revenue, with a thin bar under each city name showing its relative share

Returning customers table

- › Customers with more than one order, sorted by order count: Customer, Phone, Email, Orders (shown as e.g. "10x"), Total spent, and Last order date

Customer details table

- › Full list of every customer: Customer, Phone, Email, City, Address, Orders, and Products bought (a comma-separated list of every distinct product they have ordered)
- › "↓ Customers CSV" button — top-right of this table, downloads the full customer list as a CSV file

10.4 Users tab

Total commission payable this period									LKR 13,655

Click column header to sort

▲ Reports — Users tab

Top 4 cards

- › Total employees — count of staff accounts that have placed at least one order
- › Total orders — combined order count across all employees
- › Total commission — combined commission payable across all employees for the selected period
- › Cancelled / Returned — combined cancelled and returned order counts, shown as e.g. "14 / 8"

Orders by employee table

- › Columns: Employee (with role badge and commission rule shown underneath, e.g. "5% of rev" or "LKR 150/unit · min 5 units"), Role, Orders, Delivered, Cancelled, Returned, Revenue, Profit, Commission, Items sold
- › "Click column header to sort" — noted top-right of the table; every column listed above is sortable by clicking its header
- › A summary row at the bottom shows "Total commission payable this period" with the combined total

Note Commission rules (percentage of revenue, or a fixed amount per unit with a minimum unit threshold) are configured per staff member on the Users page, not on this Reports page — this table only displays the results of those rules.

10.5 Finance tab

The screenshot shows the Galaxy application interface. On the left is a dark sidebar with navigation links: Dashboard, Item Stock, Add Product, Warehouses, Manage Orders, Place Order, Reports (highlighted), Users, General, Help, and Billing. The main content area is titled 'Home > Reports' and has tabs for Orders, Stock, Customers, Users, and Finance (selected). Below the tabs is a month selector with buttons for Jan, Feb, Mar, Apr, May, and Jun (selected). The top right shows the date 'Thu, Jun 18, 2026 - 07:05 PM' and the user 'Admin Owner'. Below the month selector are five summary cards: Total revenue (LKR 69,950), Product cost (LKR 43,230), Commission (LKR 4,074), Other expenses (LKR 10,000), and Net profit (LKR 12,646). Below these cards is the 'JUN 2026 — FINANCE BREAKDOWN' table, which lists transactions with columns for Type, Description, and Amount. At the bottom is the 'MONTHLY PROFIT SUMMARY' table, which shows revenue, costs, and profit for each month from Jan to Jun.

TYPE	DESCRIPTION	AMOUNT
Auto	Product revenue (delivered orders)	+LKR 69,950
Auto	Product cost (purchase price)	-LKR 43,230
Auto	Commission cost	-LKR 4,074
Manual	Ad cost	-LKR 7,500
Manual	WiFi bill	-LKR 2,500
	Net profit	+LKR 12,646

MONTH	REVENUE	PRODUCT COST	COMMISSION	OTHER EXP.	TOTAL COST	NET PROFIT	MARGIN
Jan	LKR 47,440	LKR 28,910	LKR 1,459	LKR 10,500	LKR 40,869	LKR 6,571	14%
Feb	LKR 45,830	LKR 27,360	LKR 1,491	LKR 10,000	LKR 38,851	LKR 6,979	15%
Mar	LKR 50,550	LKR 30,660	LKR 1,298	LKR 5,500	LKR 37,458	LKR 13,092	26%
Apr	LKR 43,870	LKR 26,150	LKR 2,038	LKR 15,000	LKR 43,188	LKR 682	2%
May	LKR 63,990	LKR 39,150	LKR 746	LKR 11,500	LKR 51,396	LKR 12,594	20%
Jun	LKR 69,950	LKR 43,230	LKR 4,074	LKR 10,000	LKR 57,304	LKR 12,646	18%

▲ Reports — Finance tab

Month selector

- › A row of month buttons (Jan through the current month) — click any month to view that month's finance breakdown

Top 5 cards (for the selected month)

- › Total revenue — product sales revenue plus any manually added revenue entries
- › Product cost — automatically calculated from delivered orders' purchase prices
- › Commission — automatically calculated from staff commission rules
- › Other expenses — total of manually entered expense entries for the month
- › Net profit — Revenue minus Product cost, Commission, and Other expenses, with the profit margin % shown underneath; this card has a highlighted red border to draw attention to it

Finance breakdown table

- › Lists every line contributing to the month's numbers: Type (Auto or Manual, colour-tagged), Description, and Amount (green for income, red for expense)
- › Auto rows — Product revenue, Product cost, and Commission cost; these come directly from order and staff data and cannot be edited or removed here
- › Manual rows — any custom entries added via the + Add button (e.g. "Ad cost", "WiFi bill"); each has a small × button to remove it
- › A Net profit total row at the bottom of the table

" + Add" button — Add finance entry popup

▲ Add finance entry popup

- > Type — dropdown to choose Expense or Revenue
- > Title / Description — free text, e.g. "Facebook ad cost", "WiFi bill"
- > Amount (LKR) — the value to add
- > Cancel — closes without adding anything
- > "✓ Add entry" — adds the entry to the current month's finance breakdown immediately

Monthly profit summary table

- > A month-by-month history table: Month, Revenue, Product cost, Commission, Other exp., Total cost, Net profit, and Margin % — lets you compare performance across months at a glance

10.6 Product Sales Chart popup

Accessed from the Item Stock page by clicking the "Chart" button on any product row (see §5.3). This popup gives a quick 7-day sales snapshot for a single product without leaving the Item Stock page.

▲ *Product Sales Chart popup*

Popup layout — top to bottom

- > Header row — small product thumbnail (40×40px) on the left, product name and product code stacked beside it, and a close (x) button on the far right
- > Section label — "SALES TREND — LAST 7 DAYS" in small bold red uppercase text
- > Summary line — grey text showing the total number of units sold across the 7-day window, e.g. "14 units sold in last 7 days"
- > Chart area — a fixed-height canvas (220px tall) containing the bar chart
- > "View more insight" button — full-width orange-red gradient button with a right-pointing arrow icon, placed at the very bottom

Chart type and axes

- > Chart type — vertical bar chart (Chart.js "bar" type)
- > X axis (horizontal) — the last 7 calendar days, shown as DD.MM date labels, ordered oldest (left) to newest/today (right)
- > Y axis (vertical) — Sales Quantity, i.e. the number of units of this product sold on that day
- > Bar colour — solid orange (#FF5A30), rounded corners, single dataset labelled "Units sold"
- > No legend is shown since there is only one data series
- > Hovering a bar shows a tooltip with the exact unit count for that day

How the data is calculated

- › For each of the last 7 days, the system scans every order dated that day
- › Orders with status Cancelled or Refunded are excluded from the count
- › For each remaining order, it looks for line items matching this product's product code
- › The quantity field of every matching line item is summed to get that day's total
- › The 7 daily totals are also summed to produce the "units sold in last 7 days" summary line above the chart

Buttons in this popup

Button	Action
× (close)	Top right corner. Closes the popup and returns to the Item Stock table. No navigation occurs.
View more insight	Bottom of the popup. Closes the popup, navigates to the Reports page, and automatically opens the Orders tab for deeper sales analysis across all products.

Note *If a product had zero sales in the last 7 days, the chart still renders with all 7 day labels on the X axis, each showing a bar at zero — it does not show an empty or blank state.*

11. Users

Manage staff accounts, roles, status, and sales commission. Visible to Owner and Admin only.

Total: 8 users - Active: 8 - Inactive: 0

▲ Users Page

11.1 Users table

- › Search bar — filters the list by name, username, or role as you type
- › Columns: Name (with a small "View" link beside it), Username, Role (coloured badge), Status (On/Off toggle), and Last login
- › Status toggle — switches an account between active and inactive directly from the table, without opening any popup; an inactive user cannot log in to Galaxy but their account and history are kept
- › A summary line at the bottom of the table shows Total users, Active count, and Inactive count

11.2 Add User button and popup

Top-left of the page. Opens a popup to create a new staff account.

▲ Add user popup

Popup fields

- > Account status — On/Off toggle, defaults to On; helper text "Active users can log in to Galaxy"
- > First name and Last name
- > Email
- > Username — used to log in, e.g. "saman_01"
- > Password — set directly here for the new account
- > Role — dropdown of all 7 roles: Owner, Admin, Manager, Sales, Stock Keeper, Delivery, Accountant

Commission section

Add user
Fill in the details to create a new account

Commission
Enable sales commission for this user ☒ Off ☒ On

Commission method

Commission percentage (%)

Minimum product cap
Commission applies only after this qty is sold ☒ Off ☒ On

▲ Commission fields expanded

- › Commission — On/Off toggle; helper text "Enable sales commission for this user". Switching it On reveals the fields below.
- › Commission method — dropdown: "Product percentage (%)" or "Per product (fixed price)"
- › Commission percentage (%) — shown when Product percentage is selected, e.g. enter 5 for 5% of revenue
- › Minimum product cap — On/Off toggle; helper text "Commission applies only after this qty is sold", letting commission only kick in once a staff member sells a minimum number of units
- › Cancel — closes the popup without creating anything
- › "✓ Create user" — creates the account; it then appears in the Users table immediately

11.3 View User popup

Opened by clicking the "↕ View" link next to any user's name in the table.

▲ User details popup

- › Shows the user's avatar/initials, name, role badge, Username, Status, and Last login
- › "✎ Edit user" button — closes this popup and opens the same Add/Edit form pre-filled with this user's details, allowing name, role, password, status, or commission to be changed

11.4 Role permissions table

A reference table at the bottom of the Users page showing exactly what each of the 7 roles can access, feature by feature.

- › A green checkmark means that role has access to the feature; a grey × means it does not
- › Some cells show special text instead, such as "no price" for Sales on Item Stock — meaning that role can view stock but never sees purchase/selling prices

Feature	Owner	Admin	Mgr	Sales	Stock	Deliv.	Acct.

Billing	✓	×	×	×	×	×	✓

Note Every role can access *Settings — Notifications* and *Settings — Theme*, since these are personal preferences rather than business-sensitive settings. Owner is the only role with full access to every feature including *Billing*.

12. General Settings

System-wide configuration for the business, covering delivery/payment/discount options, time and currency formatting, and notification preferences. Changes apply once "Save settings" is clicked at the bottom of the page.

The screenshot shows the 'General Settings' page in the Galaxy system. The left sidebar contains navigation links: MAIN (Dashboard), INVENTORY (Item Stock, Add Product, Warehouses), OPERATIONS (Manage Orders, Place Order), ANALYTICS (Reports), and SETTINGS (Users, General, Help, Billing). The 'General' setting is selected. The main content area is titled 'Home > General' and shows the following settings:

- BUSINESS INFO**
 - Business logo: Upload button
 - Business name: e.g. Saman Clothings
 - Category: Select
 - Address: Street, City
 - Phone: 07X XXX XXXX
 - Delivery methods:

No Delivery	0	x
Koombiyo	400	x
Lanka Courier	350	x
DHL	500	x
Domex	300	x
 - Payment methods:

Cash	x
KOKO	x
Card	x
Bank Transfer	x
Mintpay	x
 - Discount codes:

DEAL15	%	15	x
- TIME & DATE**
 - Time zone: Asia/Colombo (GMT+5:30)
 - Time format: 24-hour (selected), 12-hour
- CURRENCY**
 - Symbol: LKR — Sri Lankan Rupee
 - THEME: Light (selected), Dark

A 'Save settings' button is at the bottom. A 'NOTIFICATIONS' section on the right shows alert preferences for Email alerts, New order, Order status update, User added, and Product added, all with toggle switches set to 'On'.

▲ General Settings Page

12.1 Business Info card

Business logo

- › A square preview tile on the left, showing the current logo or a placeholder image icon if none is set
- › "Upload" button below it — opens the file picker to choose a new logo image; updates the preview immediately

Business details

- › Business name — appears in the sidebar header and browser tab title throughout the system
- › Address — street and city, used on documents and receipts
- › Phone — contact number for the business

- › Category — a dropdown of business types, shown as smaller grey text under the business name in the sidebar. The 10 available categories are: Retail, Wholesale, Food & Beverage, Electronics, Clothing & Fashion, Pharmacy, Hardware & Tools, Agriculture, Automotive, and Other.

Delivery methods

- › A list of delivery options, each with a name field and a charge (LKR) field side by side
- › Red × next to each row — removes that delivery method
- › "+ Add method" button — adds a new blank delivery method row to fill in
- › These are the exact options that appear in the Delivery method dropdown on Place Order (see §9.2)

Payment methods

- › Shown as a row of removable tags (e.g. Cash, Card, Bank Transfer) rather than a list
- › Click the × on any tag to remove that payment method
- › Type a new method name into the text box and click "+ Add" to add a new tag
- › These populate the Payment method dropdown on Place Order

Discount codes

- › A list of promotional codes, each with: the code text, a type dropdown (% or a fixed LKR amount), and the value
- › Red × next to each row — removes that discount code
- › "+ Add code" button — adds a new blank discount code row
- › Entering one of these codes in the Discount code field on Place Order automatically applies the matching discount

12.2 Time & Date card

- › Time zone — a selectable dropdown, defaults to Asia/Colombo (GMT+5:30). The 7 available time zones are: Asia/Colombo (GMT+5:30), Asia/Kolkata (GMT+5:30), Asia/Dubai (GMT+4:00), Asia/Singapore (GMT+8:00), Europe/London (GMT+0:00), America/New_York (GMT-5:00), and Australia/Sydney (GMT+10:00).
- › Time format — two buttons to choose between 24-hour and 12-hour display across the system

12.3 Currency card

- › Symbol — a selectable dropdown to choose the currency shown throughout the system; defaults to LKR — Sri Lankan Rupee. The 6 available currencies are: LKR — Sri Lankan Rupee, USD — US Dollar, EUR — Euro, GBP — British Pound, AUD — Australian Dollar, and AED — UAE Dirham.

12.4 Theme card

- › Light / Dark buttons — switch the entire interface's colour scheme; the currently active option is marked with a red checkmark

12.5 Notifications card

Located in the right column, separate from the Business Info card.

- › Low stock threshold (units) — the default minimum quantity that triggers a low-stock alert across all products, unless a product has its own custom threshold set; helper text: "Alert when stock falls to or below this number"
- › Email alerts — On/Off toggle for receiving alerts by email
- › New order — On/Off toggle, alert when a new order is added
- › Order status update — On/Off toggle, alert when an order's status changes
- › User added — On/Off toggle, alert when a new staff user is added
- › Product added — On/Off toggle, alert when a new product is added

Note *These toggles control what appears in the notification bell panel (see §14.6) and whether email copies are sent, separate from the per-product low-stock threshold that can be set individually in Add Product.*

12.6 Save settings button

A full-width button at the bottom of the page. Click it after making any change above to apply it across the system — nothing on this page saves automatically except the logo upload.

13. Billing

Shows the current Galaxy subscription plan, usage stats, and full payment history. Visible to Owner and Accountant only.

The screenshot displays the Galaxy Billing interface. On the left is a dark sidebar with navigation links: Dashboard, Item Stock, Add Product, Warehouses, Manage Orders, Place Order, Reports, Users, General, Help, and Billing (highlighted). The main content area shows the 'My Subscription' section with three plan cards: Basic (LKR 2,000/month), Nova (LKR 5,000/month, marked ACTIVE), and Stellar Custom pricing. Below the plans are four summary cards: Next renewal (30 Jun 2026), Your investment (100 orders processed), Orders this month (19/500), and Outstanding (LKR 0). At the bottom is a 'Payment history' table with columns for Invoice, Period, Plan, Amount, Method, Date, and Status.

INVOICE	PERIOD	PLAN	AMOUNT	METHOD	DATE	STATUS
INV-0041	Jun 2026	Nova	LKR 5,000	Bank transfer	01 Jun 2026	Paid
INV-0036	May 2026	Nova	LKR 5,000	Cash	01 May 2026	Paid
INV-0031	Apr 2026	Nova	LKR 5,000	Bank transfer	01 Apr 2026	Paid
INV-0025	Mar 2026	Basic	LKR 2,000	Cash	01 Mar 2026	Paid
INV-0019	Feb 2026	Basic	LKR 2,000	Bank transfer	01 Feb 2026	Paid
INV-0014	Jan 2026	Basic	LKR 2,000	Cash	01 Jan 2026	Paid

▲ Billing Page

13.1 My Subscription — plan cards

Three plan cards are shown side by side: Basic, Nova, and Stellar.

Plan	Includes
Basic — LKR 2,000/month	1 warehouse, up to 500 products, up to 100 orders/month, 2 user accounts, basic reporting. Advanced reports, price batch tracking, and multi-warehouse transfers are greyed out as not included.
Nova — LKR 5,000/month	3 warehouses, unlimited products, up to 500 orders/month, 4 user accounts, full reports, price batch tracking. Unlimited warehouses and priority support are greyed out as not included.
Stellar — Custom pricing	Unlimited warehouses, unlimited products, unlimited orders, unlimited user accounts, full reports + analytics, priority support, dedicated onboarding

- › The currently active plan is marked with a blue "ACTIVE" badge next to its name, and its button reads "Active plan" instead of an upgrade prompt

- › A plan lower than the current one shows a greyed-out "Current plan is higher" button instead of an upgrade option
- › The Stellar card has a "★ Contact KNOX" button — since it is custom-priced, upgrading requires contacting KNOX directly rather than a self-service button

13.2 Usage cards

Card	Shows
Next renewal	The date the subscription next renews, with a countdown such as "17 days left"
Your investment	Total orders processed with Galaxy since signup, and how many months the account has been active
Orders this month	Orders used this month out of the plan's monthly limit, shown as e.g. "19 / 500" with a thin progress bar and remaining count underneath
Outstanding	Any unpaid balance in LKR; shows "LKR 0 — All cleared" with a green checkmark when there is nothing owing

13.3 Payment history table

A full record of past invoices, most recent first.

- › Columns: Invoice (e.g. INV-0041), Period (the billing month), Plan (colour-tagged badge), Amount, Method (Cash or Bank transfer), Date, and Status (a green "Paid" badge)
- › A small download icon at the end of each row downloads that individual invoice
- › "↓ Download all" button — top-right of the table, downloads the complete payment history at once

Note To change plan, request a custom Stellar quote, or get billing support, contact KNOX at hello@knoxlive.com or call 075 273 1474.

14. Help

Support resources, tutorial videos, and a feedback form, split into a left column (tutorials) and a right column (contact details and feedback).

▲ [Help Page](#)

14.1 Tutorial videos

Seven video cards, each covering one part of the system: Getting started with Galaxy, Item Stock (managing stock & products), Orders (placing & managing orders), Warehouses (warehouses & stock transfers), Reports (reading your reports), Users (managing users & commissions), and Settings (general settings setup).

- › Each card shows a video thumbnail with a play icon and duration (e.g. "3:42"), a title, a one-line description of what it covers, and a status label
- › All seven cards currently show "Coming soon" instead of a status, since the videos have not been recorded yet — the cards are placeholders ready for when tutorial content is added

14.2 Contact Support card

- › Phone — 075 273 1474
- › Email — hello@knoxlive.com
- › Support hours — Mon - Fri · 9am - 6pm

14.3 Send Feedback card

Type selector

- › Three buttons: Complaint, Recommendation, Question — click one to mark the feedback type; the selected button is highlighted red

Message

- › A text box to describe the issue or suggestion in free text

Send feedback button

- › Validates that a message has been entered; shows an error toast if the message box is empty
- › On success, the form is replaced with a confirmation message and a success toast appears

Note Feedback submitted here is intended to be emailed to KNOX (hello@knoxlive.com) for review, but in the current build it only shows a local confirmation — the message is not yet actually sent anywhere. For real support requests, use the Phone or Email contact details instead until this is wired up.

14.4 Profile page

Opened by clicking the profile name/avatar in the top-right corner of any page, then choosing "Profile" from the dropdown menu (see §14.6).

The screenshot displays the 'View Profile' page for an 'Admin Owner' user. The interface includes a sidebar with navigation links (MAIN, INVENTORY, OPERATIONS, ANALYTICS, SETTINGS) and a top navigation bar with the user's name and role. The main content area is divided into three sections:

- USER DETAILS:** A form for editing user information. Fields include Business name (placeholder: 'Your business name'), Username (placeholder: 'admin'), First name (placeholder: 'Admin'), Last name (placeholder: 'Owner'), Email (placeholder: 'admin@galaxy.lk'), User role (placeholder: 'Owner'), and Phone number (Optional). A 'Save changes' button is at the bottom.
- PASSWORD RESET:** A section with a text input field containing 'admin@galaxy.lk' and a 'Send reset link' button.
- REQUEST A LEAVE:** A form for requesting leave. It includes 'From' and 'To' date pickers (placeholder: 'mm/dd/yyyy'), a 'Reason' text area (placeholder: 'Reason for leave...'), and a 'Submit' button.

On the right side, there is a 'USER DETAILS' summary card showing the user's role as 'Owner', User ID as '#U0001', and User features as 'All features — full access'.

Header

- › By default, shows a large coloured circle with the user's initials (e.g. "AO" for Admin Owner), their full name, and their role underneath
- › "Change photo" button — opens the file picker to choose a real photo from the device; once selected, the coloured initials circle is replaced everywhere with the actual uploaded image, including the small avatar badge in the top-right corner of every page
- › A success toast confirms once the photo has been updated

User Details card

- › Business name — editable
- › Username — shown greyed out / read-only, cannot be changed here
- › First name and Last name — editable
- › Email — editable
- › User role — shown greyed out / read-only; roles are changed from the Users page instead, not here
- › Phone number (Optional) — editable
- › "Save changes" button — saves any edits made to the fields above

Request a Leave card

- › From and To — date pickers for the leave period
- › Reason — free text box explaining the leave request
- › Submit button — validates that dates and a reason are filled in, then shows a success toast confirming the request was submitted

Note *This is a Coming Soon feature. Submitting a leave request currently only shows a confirmation message — there is no manager approval workflow, leave balance tracking, or notification sent to anyone yet. Full leave management functionality is planned for a future update.*

Password Reset card

- › Shows the account's email address
- › "🔒 Send reset link" button — sends a password reset email to that address, using the same Forgot Password email flow shown at login (see §2.2)

User Details card (right column)

- › Role — the account's current role (e.g. Owner)
- › User ID — a unique system identifier, e.g. #U0001
- › User features — a short summary of what this role can access, e.g. "All features — full access" for Owner

14.5 Profile dropdown menu

Clicking the name/avatar badge in the top-right corner of any page (next to the notification bell) opens a small dropdown.

▲ Profile dropdown menu

- Profile — navigates to the View Profile page described above
- Sign out — logs out of the account and returns to the Login page

14.6 Notification panel

Clicking the bell icon in the top bar (next to the date/time) opens the Alerts panel, showing recent system notifications.

▲ Alerts notification panel

- A red badge with a number sits on the bell icon showing the count of unread alerts
- Opening the panel automatically marks every alert as read and clears the badge
- "Clear all" link — top-right of the panel, removes every alert from the list

Alert types

Alert	Example
Low Stock Warning	"Earphones (Generic) — only 4 units left" — triggers when a product drops to or below its low-stock threshold
Stock Transfer Complete	"10 × Samsung USB Charger: Main Store → Galle Branch" — confirms a warehouse-to-warehouse transfer finished

Order Delivered	"ORD-001 has been delivered successfully" — triggers when an order's status changes to Delivered
New Order Placed	"ORD-001 · Saman Perera · LKR 1,700" — triggers whenever a new order is created

- › Each alert shows an icon matching its type, a bold title, a description line, and a timestamp (time and date)
- › Clicking an alert (the › arrow on the right) can navigate to the related page, e.g. an order alert opens that order

Note Which of these alert types are generated is controlled by the toggles on the General Settings page (see §12.5) — turning a toggle off there stops that type of alert from appearing here.

15. Setting Up for a New Client

Steps to configure Galaxy before handing over to a client.

Step 1 — Business information

- › Go to Settings → General Settings
- › Enter business name, category, address, and phone
- › Upload the client logo
- › Click Save

Step 2 — Delivery and payment methods

- › Update delivery methods with the courier services the client uses
- › Update payment methods to match accepted payment types
- › Click Save

Step 3 — User accounts

- › Go to Settings → Users
- › Update names, usernames, and passwords with real staff details
- › Assign correct role to each person
- › Set commission for sales staff if applicable

Step 4 — Warehouses

- › Go to Inventory → Warehouses
- › Rename or add warehouses to match real storage locations

Step 5 — Products

- › Go to Inventory → Add Product
- › Add real products with correct prices and stock quantities

Step 6 — Announcement images

- › Replace sample images with the client's own banners
- › Recommended size: 1080 × 1350px portrait format

Step 7 — Hand over

- › Share the configured Galaxy.html file
- › Provide login credentials
- › Walk through Dashboard, Manage Orders, and Reports

Note Galaxy stores all data in the browser session. Data resets when the browser tab is closed. Contact KNOX for the server-connected version with permanent data storage.

16. KNOX Client Manager (separate tool)

Note This is a completely separate single-file HTML tool, used by KNOX internally to track its own agency clients and their billing. It is not part of the Galaxy retail system documented in the rest of this guide, and customers never see or use it. File: `KNOX_ClientManager.html`.

16.1 Login page

▲ Client Manager login page

Visually matches Galaxy's login screen (same dark starfield background, glass card, Rubik font, and red-orange gradient button) so it feels consistent with the tool already used daily.

- Demo credentials: admin / knox123

16.2 Dashboard layout

▲ Client Manager dashboard

Top stat cards

- › Total clients — count of all clients ever added
- › Active — clients currently paying and in good standing
- › On trial — clients within their 7-day free trial window
- › Blocked — clients with no payment recorded, access withdrawn
- › Collected this month — total Rs. received in the current calendar month
- › Outstanding — total Rs. owed across all clients, from unpaid setup-fee installments and unpaid subscription periods combined

Income & Profit chart

- › Revenue / Profit / Outstanding toggle — switches what the bar chart displays, last 6 months
- › Four summary figures below the chart: Total collected, Setup fees collected, Subscription revenue, and Outstanding

Note The Profit figure is currently a placeholder calculated as roughly 65% of revenue — it is not based on real cost data. This can be replaced with an accurate figure once actual costs (time, tools, overheads) are defined.

Client table

- › Status filter pills — All / Active / Trial / Blocked, click to filter the table
- › Search box — filters by client name or contact person
- › Columns: Client (with contact person underneath), Plan (colour-coded badge), Status, Setup fee (progress, e.g. "2/4 months"), This month (Paid/Pending/Trial/Not entered badge), Next due, and a View link
- › Clicking anywhere on a row opens that client's detail popup

16.3 Add Client popup

▲ Add Client popup

Fields

- › Client / Business name, Contact person, Phone, Email (optional)
- › Plan — dropdown of all 5 plans (see §16.5 for full pricing breakdown)
- › A note box under the Plan field updates automatically to explain that plan's setup fee, installment amount, and subscription cost the moment a plan is selected
- › Start date — used to calculate the 7-day trial countdown and the next renewal date
- › Setup fee payment — Full pay (one-time) or 4-month installment
- › 7-day free trial toggle — turn on for a new client who hasn't paid yet
- › Notes — free text for anything specific about the client

Example with the Unlimited plan selected, showing the note box explaining its specific terms:

Client / Business name: e.g. Expo Ceylon
Contact person: e.g. Mr. Perera
Phone: 07X XXX XXXX
Email (optional): client@example.com

Plan: Unlimited — Rs. 7/order (500+ orders/month)

This plan includes a one-time setup fee of Rs. 20,000, payable in full or as 4 monthly installments of Rs. 5,000 each. Billing: Rs. 7 per completed order, intended for clients doing 500+ orders/month. There is no yearly option for this plan. Each month's bill amount is entered manually based on that month's order volume.

Start date: 06/18/2026
Setup fee payment: Full pay (one-time)

7-day free trial
Client gets 7 days before first payment is due

Sign out

▲ Add Client popup with Unlimited plan selected

16.4 Client detail popup — payment tracking

Opened by clicking any client row or its View link. This is where setup fee and subscription payments are tracked and manually marked.

▲ Client detail popup — fixed-rate plan

Setup fee tracker

- Full pay plans show a single row for the entire Rs. amount
- Installment plans show 4 separate rows (Month 1-4 of 4), each roughly a quarter of the plan's setup fee
- Each row has its own "Mark paid" / "Mark unpaid" button — since there is no automated payment system yet, this is a manual action done after confirming payment was received

Subscription payments

- Shows the last 6 billing periods (months for Monthly and Unlimited plans, years for Yearly plans)
- Each period has its own "Mark paid" / "Mark unpaid" button, same manual approach as the setup fee

For Unlimited (pay-per-order) plan clients specifically

▲ Client detail popup — Unlimited plan with editable monthly amounts

- › Since the bill is different every month depending on order volume, each period row has an editable Rs. amount field instead of a fixed price
- › Type the month's bill amount into the field — it saves automatically when you click away
- › "Mark paid" is blocked with an error message if no amount has been entered yet for that period, to prevent accidentally marking an unknown amount as paid
- › A period with no amount entered shows a "Not entered" badge in the main client table instead of "Pending"

Block / Unblock

- › "⊘ Block client" button — manually cuts off a client (e.g. for non-payment); the button changes to "✓ Unblock client" once blocked
- › Blocking a client also turns off their trial flag, since a blocked client is no longer "on trial"

7-day trial countdown and auto-block

- › While a client is on trial, the detail popup shows a note with the exact number of days remaining
- › If 7 days pass from the client's start date with no plan conversion, the system automatically flips their status from Trial to Blocked — this happens on its own, with no manual action needed
- › Once payment is confirmed, manually click Unblock to restore their access

Edit client

- › "🔧 Edit client" button — reopens the Add Client form pre-filled with this client's details for editing

16.5 Plans and pricing

Plan	Subscription	Setup fee	Notes
Monthly — 2K	Rs. 2,000/month	Rs. 20,000	Full pay or 4× Rs. 5,000 installments
Monthly — 5K	Rs. 5,000/month	Rs. 20,000	Full pay or 4× Rs. 5,000 installments
Yearly — 2K package	Rs. 20,000/year	Rs. 40,000	Discounted vs. paying monthly; full pay or 4× Rs. 10,000 installments
Yearly — 5K package	Rs. 50,000/year	Rs. 70,000	Discounted vs. paying monthly; full pay or 4× Rs. 17,500 installments
Unlimited (pay-per-order)	Rs. 7 per completed order, billed manually each month	Rs. 20,000	No yearly option; intended for clients doing 500+ orders/month; full pay or 4× Rs. 5,000 installments

Note All setup fees use the same two payment methods — full pay (one-time) or split across 4 monthly installments. The installment amount shown in the Add Client note box is automatically calculated as the plan's setup fee divided by 4.

16.6 Announcement & Notifications

Opened from the sidebar (Settings → Announcement). Two separate, independent features live in this one popup.

▲ *Announcement and Notifications popup*

Announcement images

- › Up to 5 image slots, matching the announcement banner shown on the main Galaxy system
- › Click an empty slot (showing a + icon) to upload an image from the device
- › Each filled slot shows its position number and a × button to remove it

Notification panel

- › A fully separate list of text notifications (title + message + date), independent from the images above
- › Newest notifications appear at the top of the list
- › Title and Message fields plus an "+ Add notification" button create a new entry immediately
- › Each notification has its own × button to remove it individually
- › An empty state message appears if no notifications exist yet

16.7 Known limitations

- › All data lives only in the browser session — closing the tab resets everything back to the sample data shown in this guide; there is no permanent storage or login persistence yet
 - › Payment marking is entirely manual — there is no integration with any real payment gateway or bank feed
 - › The Profit figure on the income chart is an estimated 65% margin placeholder, not calculated from real costs
-
